PREFACE

College Management System is not only to provide an easy way to automate all functionalities of a college, but also to provide full functional reports to top management with the details about any aspect of college. College Management System provides an attractive environment where you can manipulate data and information about students and staff easily. So we can say the core purpose of designing “College Management System” is to manage the task related to the college students/teachers and to reduce time to searching of appropriate candidates in college view.

The system provides the details structure of college campus and its departments, College Management System synchronizes the working of all the departments. It looks on all aspects of a college, its students, faculties, department, marks and other co-curricular activities.

College Management software is a simple and powerful one joint integrated platform that connects all the various departments of an institution like staff details and also networking environment. The system uses .NET Technology.

ACKNOWLEDGEMENT

It gives us immense pleasure to express our sincere and whole hearted sense of gratitude to our esteemed guide Mr. Amar Paul Singh for their invaluable and untiring guidance and supervision throughout our study.

We take this opportunity to express our sincere thanks and full appreciation to all those people who extended their whole hearted cooperation, moral support and rendering ungrudging assistance whenever and wherever need aroused. We wish them very best in their life.

Our heartiest thanks to Principal Sir, Mr. Jagdish Lal, who instilled confidence in us to improve our skills for academic and professional pursuits. Our heartiest thanks to God, Parents, Teacher, and Friends. All cannot be mentioned but none can be forgotten.
